

(9) Property insurance premiums, taxes, cost of utilities, and repair and maintenance of sales promotion, marketing, and after-sales service offices and distribution centers, where such costs are identified separately for sales promotion, marketing, and after-sales service of goods on the financial statements or cost accounts of the producer; and

(10) Payments by the producer to other persons for warranty repairs;

(u) *Self-produced material*. “Self-produced material” means an originating material that is produced by a producer of a good and used in the production of that good;

(v) *Shipping and packing costs*. “Shipping and packing costs” means the costs incurred in packing a good for shipment and shipping the good from the point of direct shipment to the buyer, excluding the costs of preparing and packaging the good for retail sale;

(w) *Total cost*. “Total cost” means all product costs, period costs, and other costs for a good incurred in the territory of one or both of the Parties. Product costs are costs that are associated with the production of a good and include the value of materials, direct labor costs, and direct overhead. Period costs are costs, other than product costs, that are expensed in the period in which they are incurred, such as selling expenses and general and administrative expenses. Other costs are all costs recorded on the books of the producer that are not product costs or period costs, such as interest. Total cost does not include profits that are earned by the producer, regardless of whether they are retained by the producer or paid out to other persons as dividends, or taxes paid on those profits, including capital gains taxes;

(x) *Used*. “Used” means utilized or consumed in the production of goods; and

(y) *Value*. “Value” means the value of a good or material for purposes of calculating customs duties or for purposes of applying this subpart.

§ 10.914 Originating goods.

Except as otherwise provided in this subpart and General Note 32(m), HTSUS, a good imported into the customs territory of the United States

will be considered an originating good under the PTPA only if:

(a) The good is wholly obtained or produced entirely in the territory of one or both of the Parties;

(b) The good is produced entirely in the territory of one or both of the Parties and:

(1) Each non-originating material used in the production of the good undergoes an applicable change in tariff classification specified in General Note 32(n), HTSUS, and the good satisfies all other applicable requirements of General Note 32, HTSUS; or

(2) The good otherwise satisfies any applicable regional value content or other requirements specified in General Note 32(n), HTSUS, and satisfies all other applicable requirements of General Note 32, HTSUS; or

(c) The good is produced entirely in the territory of one or both of the Parties exclusively from originating materials.

§ 10.915 Regional value content.

(a) *General*. Except for goods to which paragraph (d) of this section applies, where General Note 32(n), HTSUS, sets forth a rule that specifies a regional value content test for a good, the regional value content of such good must be calculated by the importer, exporter, or producer of the good on the basis of the build-down method described in paragraph (b) of this section or the build-up method described in paragraph (c) of this section.

(b) *Build-down method*. Under the build-down method, the regional value content must be calculated on the basis of the formula $RVC = ((AV - VNM)/AV) \times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VNM is the value of non-originating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced.

(c) *Build-up method*. Under the build-up method, the regional value content must be calculated on the basis of the formula $RVC = (VOM/AV) \times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VOM is
